

This test is designed for a duration of 4 hours

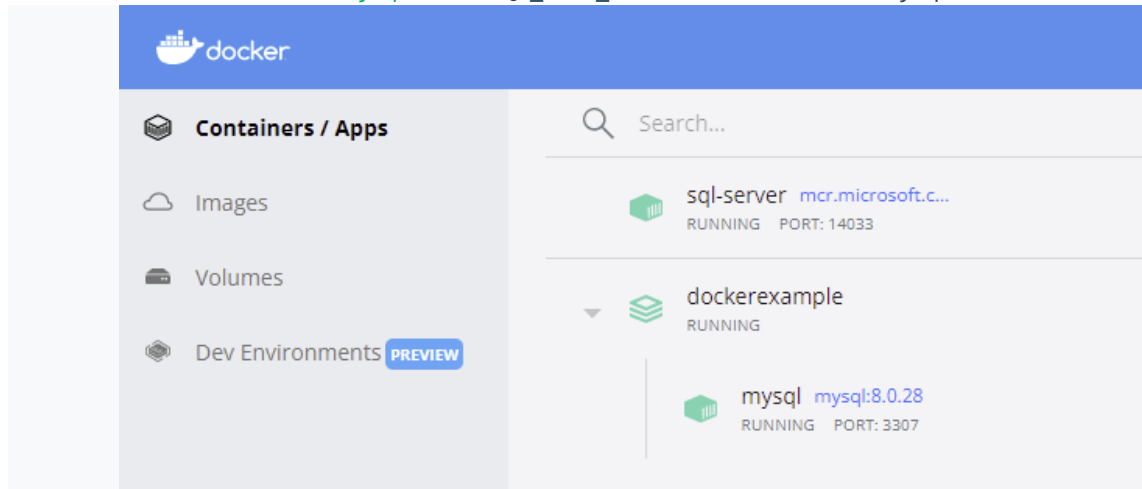

Activities:

1. Make a Docker container with Mysql

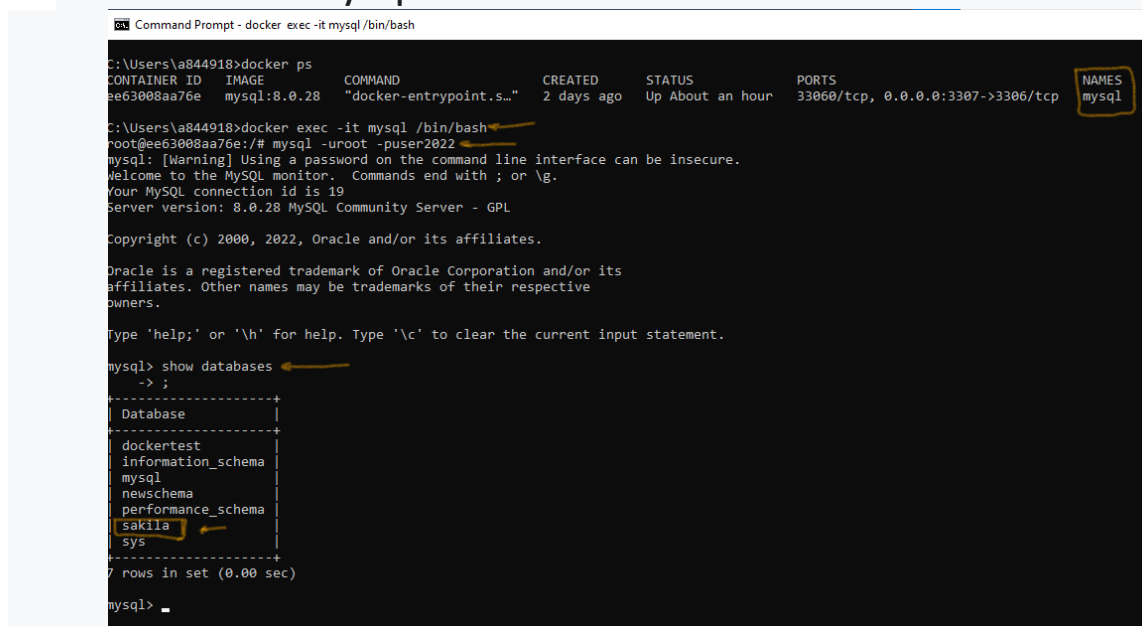

Step 1: download image from docker hub https://hub.docker.com/_/mysql
`docker pull mysql`

Step 2: create container

`docker run --name mysql -e MYSQL_ROOT_PASSWORD=user2022 -d mysql:latest/8.0.28`

2. Load into mysql sakila db

<https://downloads.mysql.com/docs/sakila-db.tar.gz>

3. Inside sakila db modify 2 film records values
4. List of movies by actor
5. Count number of movies per actor
6. Count movie languages
7. Calculate average cost for replacement of a film
8. do a store procedure to update the film
